

National On-Site Providers Association

## who we are

The wastewater treatment industry is highly regulated and subjected to frequent changes made by Federal, State and Local governments.

This can present significant challenges to our industry and the delivery of fit-for-purpose environmental and economic solutions.

We represent businesses in this sector to help them connect with stakeholders to ensure appropriate regulations and standards are established and maintained.

## our mission

Our aim is to ensure our members are able to operate in a landscape of clear, fair and acceptable regulations and standards across the country,
